Molecular and Cellular Biochemistry:

An International Journal for Chemical Biology in Health and Disease

CONTENTS VOLUME 190, Nos. 1 & 2, January (I) 1999

MUSCLE PHYSIOLOGY AND BIOCHEMISTRY
Shoichi Imai, Makoto Endo and Iwao Ohtsuki

Preface 1
M. Endo: Dedication 3–4
J. Gergely: Professor Ebashi's impact on the study of the regulation of striated muscle contraction 5–8
S.V. Perry: Troponin I: Inhibitor or facilitator 9–32
I. Ohtsuki: Calcium ion regulation of muscle contraction: The regulatory role of troponin T 33–38
K. Yamada: Thermodynamic analyses of calcium binding to troponin C, calmodulin and parvalbumins by using microcalorimetry 39–45
M. Yazawa, K.-i. Nakashima and K. Yagi: A strange calmodulin of yeast 47–54
A.G. Szent-Györgyi, V.N. Kalabokis and C.L. Perreault-Micale: Regulation by molluscan myosins 55–62
Y. Yazawa and M. Kamidochi: The properties and function of invertebrate new muscle protein 63–66
A. Weber: Actin binding proteins that change extent and rate of actin monomer-polymer distribution by different mechanisms 67–74
M. Tanokura and Y Suzuki: A phosphorus-31 nuclear magnetic resonance study on the complex of chicken gizzard myosin subfragment 1 with adenosine diphosphate 75–78
D.J. Hartshorne and K. Hirano: Interactions of protein phosphatase type 1, with a focus on myosin phosphatase 79–84
K. Fujita, L.-H Ye, M. Sato, T. Okagaki, Y. Nagamachi and K. Kohama: Myosin light chain kinase from skeletal muscle regulates an ATP-dependent interaction between actin and myosin by binding to actin 85–90
T. Murahashi, A. Fujita and T. Kitazawa: Ca^{2+}-induced Ca^{2+} desensitization of myosin light chain phosphorylation and contraction in phasic smooth muscle 91–98
T. Masuda, K. Ohmi, H. Yamaguchi, K. Hasegawa, T. Sugiyama, Y. Matsuda, M. Iino and Y. Nonomura: Growing and differentiating characterization of aortic smooth muscle cell line, p53LMAC01 obtained from p53 knock out mice 99–104
K. Sobue, K. Hayashi and W. Nishida: Expressional regulation of smooth muscle cell-specific genes in association with phenotypic modulation 105–118
I. Niki and H. Hidaka: Roles of intracellular Ca^{2+} receptors in the pancreatic β-cell in insulin secretion 119–124
Y. Soeno, H. Yajima, Y. Kawamura, S. Kimura, K. Maruyama and T. Obinata: Organization of connectin/titin filaments in sarcomeres of differentiating chicken skeletal muscle cells 125–131
K.-i. Kusano, H. Abe and T. Obinata: Detection of a sequence involved in actin-binding and phosphoinositide-binding in the N-terminal side of cofilin 133–141
E. Ozawa, Y. Hagiwara and M. Yoshida: Creatine kinase, cell membrane and Duchenne muscular dystrophy 143–151
T. Masaki, H. Ninomiya, A. Sakamoto and Y. Okamoto: Structural basis of the function of endothelin receptor 153–156
Y. Yoshida, A. Toyosato, M.O. Islam, T. Koga, S. Fujita and S. Imai: Stimulation of plasma membrane Ca^{2+}-pump ATPase of vascular smooth muscle by cGMP-dependent protein kinase: Functional reconstitution with purified proteins 157–167
H. Yamamoto and M. Kawakita: Chemical modification of an arginine residue in the ATP-binding site of Ca^{2+}-transporting ATPase of sarcoplasmic reticulum by phenylglyoxal 169–177
M. Hirata, M. Yoshida, T. Kanematsu and H. Takeuchi: Intrinsic inhibitor of inositol 1,4,5-trisphosphate binding 179–184
M. Iino: Dynamic regulation of intracellular calcium signals through calcium release channels 185–190
Y. Ogawa, T. Murayama and N. Kurebayashi: Comparison of properties of Ca^{2+} release channels between rabbit and frog skeletal muscles 191–201
